

# EASY STEPS

TO MAKE YOUR GARDEN

MORE ECO-FRIENDLY

GARDENING IS VERY GOOD FOR YOUR HOUSE'S OVERALL FEEL AND YOUR OWN HEALTH.

DON'T THROW AWAY YOUR GARDEN WASTE

01

THERE ARE SO MANY THINGS OUT THERE THAT CAN BE RECYCLED, AND THAT INCLUDES YOUR GARDEN WASTE! DEAD LEAVES AND BRANCHES CAN, IN FACT, BE CONVERTED TO FERTILIZERS BY PROCESSING THEM PROPERLY.

02

DON'T USE LAWN MOWERS!

WHILE USING LAWN MOWERS IS FASTER THAN USING YOUR OWN HANDS IN CUTTING GRASSES, IT CREATES CARBON POLLUTANTS. TO PREVENT ACCIDENTAL POLLUTION FROM YOUR LAWN MOWERS, CUT THE GRASSES MANUALLY INSTEAD TO PREVENT A DISCHARGE OF CARBON POLLUTANTS.

DECREASE THE AMOUNT OF DIG

03

DIGGING THE SOIL IS IMPORTANT FOR PLANTING TREES AND OTHER PLANTS. HOWEVER, THE SOIL ALSO CONTAINS SO MANY CARBON SUBSTANCES THAT ARE HARMFUL FOR THE CLIMATE. BECAUSE OF THAT, TRY REDUCING THE AMOUNT OF DIGS IN YOUR GARDEN.
